

FLYING CRAWLING AEROSOL 500 ML

Immediate repellent effect

Composition

Chrysanthemum cinerariaefolium ext. (CAS n°89997-63-7) 0,5 g/kg, citronellal (CAS n° 106-23-0) 8g/kg

Final aerosol composition: Chrysanthemum cinerariaefolium ext. (CAS n°89997-63-7) 0.025%, citronellal (CAS n° 106-23-0) 0,4%

Description

Insect repellent aerosol has been specially designed to protect the installation's surfaces from insects without killing them.

Immediate repellent action against many flying and crawling insects: flies, mosquitoes, ticks, bedbugs, cockroaches, etc.

Repels insects for up to 7 days.

Effective protection for insect-free living spaces.

Pyrethrum and citronellal-based. Innovative formula for which a marketing authorisation application has been filed in accordance with European regulations.

TP19: repellent.

Method of application

Dose : 500 ml aerosol protects 10 m².

Treatment against ants, flies and gnats : These insects enter the home or conservatory through openings such as doors and windows, as well as through cracks in the walls.

Apply a barrier treatment to all openings and cracks in a strip around 15 cm wide (spray 30 cm from the surface).

Treatment against spiders : Spiders need corners and edges to set up their webs. Treat by applying a strip of product to the edges of walls, ceiling/wall junctions and along beams.

Mosquito treatment : Apply around light sources, headboards, windows and curtains.

Treatment against fruit flies : Treatment of credenzas, sink surrounds and all surfaces where unpackaged perishable foodstuffs are stored, avoiding contact with food.

General recommendations

On fragile or porous surfaces, test on a hidden surface to check that the product does not stain.

This product is only a preventive treatment to prevent or limit infestation. It must not be applied directly on the insects. In the event of infestation, use an insecticide or call in a professional.

TARGETS

crawling and flying insects
